11th IMPACTS International Conference
Berlin

Programme

Close the gap

3 - 6 June 2009

**WZB (Social Science Research Center Berlin)
Berlin, Germany**

mvaconsultancy

Information Management Policies Assessment for City Transportation Systems (IMPACTS)

IMPACTS is an international network of European, North American and Latin American cities established as a forum for exchanging information about urban mobility and transportation policies. The diverse cities recognise that they share similar problems, and recognise the value in sharing information as they work toward their common vision of sustainable transportation solutions.

IMPACTS is a federation of three organizations:

IMPACTS Europe

IMPACTS Europe is an association registered in France with its Secretariat located in the offices of MVA Consultancy in London. The network brings together political decision makers from Amsterdam, Barcelona, Berlin, Brussels, Budapest, Geneva, Göteborg, London, Paris, Rome, Vienna and Zagreb.

IMPACTS North America

IMPACTS North America was created in 1996 on the initiative of NACTO, the National Association of City Transportation Officials. The cities are typically represented by high-ranking transportation officials, who work directly with their Mayors and are responsible for proposing and implementing mobility strategies.

IMPACTS America Latina

IMPACTS America Latina was formed in 2004. The first conference was held in Quito. IMPACTS Europe through its member cities of Barcelona and Geneva provide assistance, and further collaboration between the European and Latin American cities is planned.

Welcome to Berlin

I would like to extend a warm welcome to our city on behalf of the Mayor of Berlin.

As in previous years we invite delegates to join us in an informal and relaxed debate about issues that effect all our cities, whether they are large or small. This year's conference - the 11th International IMPACTS Conference - focuses on the theme of 'Close the gap'. The topic responds to the increasing gap between obligations placed on cities and the possibility of cities to meet those targets. How can cities meet standards (eg environmental) set at National, European and International levels?

Both in Europe and North America 2009 is a year of debate on urban transport policy. The European Commission has its action plan on urban transport policy which could stimulate discussion of issues that equally affect world cities. Similarly the anticipated debate on U.S. Federal transportation policy could add a further dimension to discussion at the conference.

I hope we will see a strong representation from Europe and North America at what has become a vibrant annual gathering, and look forward to meeting you all again in Berlin this summer.

Maria Krautzberger

President of IMPACTS Europe

Conference Registration & Help Desk

The registration desk staffed throughout the conference is located next to the conference room. It will open from 09:00 on Thursday 3 June 2008.

Interpretation in French and English will be provided for all conference sessions.
